**Conference Scheduling
Made Simple**

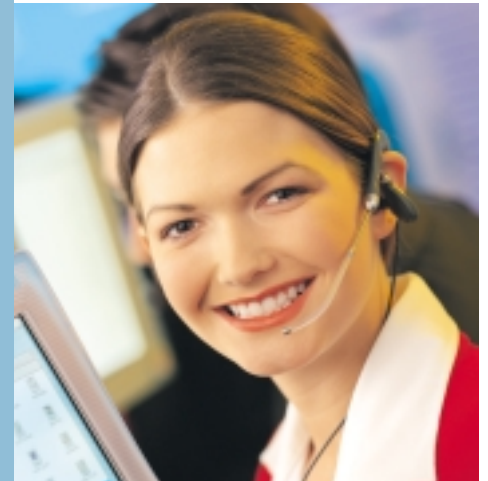

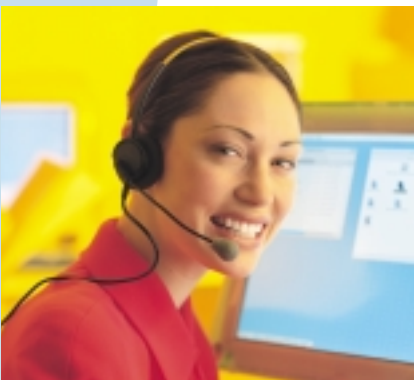

Flexible and cost-effective communication - the key to success

In today's business environment, quick decisions and seamless communication are a vital aspect of retaining your firm's competitive edge. You need the ability to contact your team members at any moment, wherever they are. You need the convenience and efficiency of conference calls for sharing essential information in real time, but without the costs of external conferencing services.

You need your own dedicated conference bridge - accessible at every moment for that critical conference call

Utilizing Coral's Sophisticated Conferencing Possibilities to the Full

Coral Conferencing Solutions It's your system. You decide.

Tadiran's Coral telephony server answers this need for a cost-effective, user-friendly conference bridge. Offering you the benefits of possessing your own conference resources, Coral facilitates communication among partners, suppliers, customers and personnel, both at home and abroad, and cuts down the time and costs associated with traveling to meetings.

Coral is also completely flexible to meet the requirements of individual organizations and can be expanded as your company grows.

- You decide when to take advantage of the Coral conferencing capabilities.
- You decide on conference parameters.
- And you avoid connection charges and per minute, per participant fees.

Making conference scheduling simple

The Conference Bridge Manager is an integral part of Tadiran's Coral telephony system, offering simple management of your conferencing requirements and allowing you to take full advantage of Coral's advanced conferencing possibilities.

On one hand, the Coral Bridge Manager will help you make the most of the tools you have. On the other hand, it will assist you in streamlining operations, saving time and leading to maximum efficiency.

Utilizing Every Resource to the Full

How will the Conference Bridge Manager help you?

The Conference Bridge Manager allows conference calls to be scheduled simply and conveniently. Through everyday tools already familiar to your workforce, such as using Outlook capabilities (email, meeting organizer and reminders) and telephone, conference parameters may be determined and relevant personnel notified.

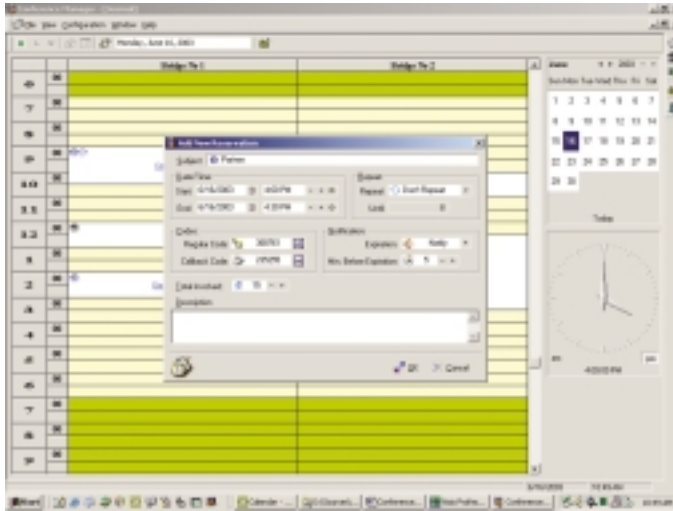

No Compromise on Security

The Conference Bridge Manager ensures that participation in each conference call is strictly controlled. This guarantees that only those authorized are allowed to participate while unwanted intruders are denied access.

How does it Work?

Scheduling a Conference

The conference originator may request an immediate conference or schedule for a future date, with a range of options such as repeat scheduling for conference calls held regularly.

Upon entering the system, the originator determines various parameters such as time, date, duration and number of participants. The number of participants is virtually unlimited, and depends on the system configuration. The system also issues a conference reservation ID, ensuring that only the originator can alter these parameters, then notifies the other participants.

If the originator wishes to begin a conference call immediately, the Conference Bridge Manager will allocate a conference circuit and notify the other participants via telephone, email or DECT digital cordless communication system.

Joining a Conference

Joining a conference call is equally straightforward. Participants receive the relevant information about the conference, including a DID number to call and an ID code.

At the appropriate time, participants call the system and enter the code. If the conference is already underway, the participant's name will be announced to the other participants, and the new participant may request to hear the names of those already participating.

If participants call before the scheduled start, they may request that the Conference Bridge Manager call them back at the correct start time, freeing a busy workforce to concentrate on the task at hand and avoid the distraction of watching the clock.

The Benefits of the Conference Bridge Manager

- Easy to install
- Convenient conference scheduling - simple and user-friendly
- Callback option - so that you can get on with your work
- Interfaces with standard tools familiar to any workforce
- Log option, for complete record of conference calls and participants
- Enables conference call to be scheduled at any time, from anywhere
- Conference parameters may be changed at any time, including during the conference itself
- Advanced warning option notifies participants shortly before termination of call
- Takes into account participant's previous conference commitments when scheduling
- Makes international conferencing simple - for overseas partners, suppliers, branches and customers
- Extremely cost effective

The Sophisticated Technology of a Leading Telecommunications Developer

Like the entire Coral conferencing network, the Conference Bridge Manager benefits from the latest technological advances together with the expertise, experience and proven reliability of Tadiran Telecom.

- Interfaces with the Coral telephony server, the Coral IPx/FlexiCom and FlexAttendant, and is completely compatible with FlexAir, Coral's advanced DECT digital cordless communication system, as well as other DECT systems
- Conferences scheduled via DTMF (touchtone) menu and the originator's Outlook calendar and email may be updated with the conference details
- Easily expanded to meet the needs of a growing organization; fully compatible with legacy systems
- High security and reliability; no signal loss on any internal station

Sophisticated technology -
Taking care of itself, so that you can concentrate on your own work
