

Case Study

Wireless Telephony for "IKEA"

The Customer: **IKEA ATHENS / GREECE**

IKEA is a reality in Athens as well. An area of 25,000 sq. meters is waiting everybody to explore it. Visiting IKEA you can find out what's possible with good design, the right price, and a little imagination. Additionally visitors can leave their children in Smaland, grab a bite to eat at the restaurant, and take a bit of Sweden back home with good from the Swedish Shop. A visit to IKEA is a day out for the whole family!

The needs: IKEA needed to offer mobility for 60 employees and 60 customers who have left their children at IKEA playground (Smaland). The employee should be able to handle incoming and outgoing calls while customers should be able to accept or make call to the responsible playground person.

The equipment used:

- 1 x KIRK dect-z System 3000
- 1 x 16SKK
- 10 x base stations - RFP
- 140 x Handsets - 4020/40

The Result:

KIRK dect-z System 3000 was the right choice for:

- Covering a huge area with low cost in short time.
- Offering mobility to 140 users (both employees and customers).
- Providing future expandability on radiocoverage and number of users as well.
