Coral FlexAir™
Business on the Move

A Missed Call is a Missed Opportunity

Today's mobile work force must be in constant touch with clients, prospects and colleagues. Whether calling a client across town or talking to a manager in another part of the building, you need the ability to stay in contact with others when you walk away from your office.

Coral FlexAir™ from Tadiran Telecom brings the best of wireless technology directly to your business telephone system. Whether integrated in your Coral® system or used with another system, Coral FlexAir delivers desktop telephone features to people on the move.

Extend the office telephone to people on the move.

Like Bringing the Office Phone with You

The full-featured Coral FlexAir provides a wireless extension of your desktop telephone, making it the ideal solution for staying in touch around the office, manufacturing plant, hospital or campus environment. With access to advanced features such as call waiting, call transfer, caller ID and three-way conferencing, Coral FlexAir improves communications and productivity by making you available wherever you go.

Mobility and Convenience ...

... with No Airtime Costs

The cost-effective Coral FlexAir uses a government-allocated frequency band for in-building microcellular operation to deliver full roaming and handoff capability – without airtime charges.

... with Powerful Capabilities

Coral FlexAir is an integrated wireless solution that supports up to 16 base stations per card and up to 256 calls in an area of nearly two million square meters. For extended coverage in low-traffic areas like hallways and walkways, position the exclusive Coral FlexAir repeater instead of another base unit.

... with Security and Reliability

Secure speech encoding and world-class speech quality deliver the reliability and security needed for today's business communications. And with available talk time of about 10 hours and standby time of about 90 hours, Coral FlexAir provides ready communications to anyone on the move, at any time.

... with Lightweight Ease-of-Use

With its ergonomic, lightweight design, FlexAir easily fits in a pocket and is comfortable to hold and use. A large detailed liquid crystal display provides 3 lines of 12 alphanumeric characters, plus several icons to show messages.

Coral FlexAir Delivers a Number of Business Benefits to Improve Your Bottom Line

- Make employees available to customers at any time, even when they leave their desks. Customer satisfaction is improved by eliminating long on-hold times and “phone tag.”
- Do away with missed opportunities; Coral FlexAir allows sales staff to be more flexible in responding to prospective customers' calls.
- Increase productivity by enabling employees to respond to problems and requests on the spot.
- Reduce costs by taking advantage of no airtime charges within your environment. Better still, continuous availability means you will make fewer return calls at cost to your business.

Coral FlexAir Business on the Move
